PRODUCT: Spectrum® Bright Purple Presoak Stock # 1301

Description: An effective, highly concentrated, deep cleaning low-pressure detergent. Begins the deep cleaning process that is followed by the high-pressure detergent application.

Color: Bright Purple

Scent: Fresh Fruity

Foaming Ability: High

<u>Features</u>	=	<u>Benefits</u>
Bright Purple Color	=	Customer appeal at use dilutions.
Clean Fragrance	=	More customer appeal.
Good Cleaner	=	Produces results.
Not Harsh	=	Easy on equipment and people.
Titratable	=	Quickly determine dilution ratio

<u>Application</u>	<u>Dilution Ratios</u>		
<u>Self-Serve Systems</u>	<u>Strongest</u>	<u>Weakest</u>	<u>Average</u>
Foam or Spray - Low-pressure presoak	1:60	1:100	1:80

Required strength of product dilution will vary depending on cleaning conditions and type and condition of equipment used.

Guidelines for Application

Water Quality: Use SOFT WATER for best performance! In hard water (over 0 grains) increase strength by 10% for each grain of water hardness (1:60 + 10% = 1:54). Trying to clean in frictionless washes with water over 2 grains of hardness is not recommended.

Solution Temperatures: Most self-serves will use cold water, but cleaning will improve if applied with warm (100-120°F) water. Warm water is especially recommended in colder weather.

Dwell time: Allow a minimum of 30 seconds prior to following with either a high-pressure wash or high pressure rinse.

Special Instructions: When a self serve uses one product for low pressure presoak and tire cleaner use Spectrum® Bright Purple Presoak between 1:30 and 1:40.

PRODUCT: Spectrum[®] Bright Purple Presoak Stock # 1301

Alternative Products

Spectrum[®] Low Pressure Pre-soak: Apply at a dilution between 1:60 and 1:100

One Step Plus[™]: Apply at a dilution between 1:100 and 1:150

Horizon[™] A high foaming and scented frictionless detergent. Use at about 1:150

Advantage[®] or Performix[®] Premium alkaline presoaks with reclaim settling abilities.

Determining Dilution Ratio

Due to the high level of color in this product, titration is not possible. Use the following method: Determine the volume of the Hydrominder tank and measure draw of raw product vs. diluted product, see CSI "HYDROMINDER DILUTION RATIO CHART" for instructions.
