## **Applications / Dilution Ratios**

General best dilution ratio is from 1:10 to 1:25.  
Adjust for the desired effect with the best economy.

**Recommended Tip:** Start with a Red or White tip and adjust for best results.

## **Guidelines for Application**

**Water Quality:** Use Soft Water for best results and economy.

**Solution Temperatures:** Most self serve washes use cold water but heating the water to 100°F will improve cleaning performance.

**Caution:** ANY cleaning product can damage extremely hot wheels. Encourage customers to cool wheels before cleaning.
