PRODUCT:

SuperSlick®

Stock # 1806

Description: Thick, viscous, liquid foaming detergent with excellent lubricity and cleaning ability in foam, clothe and brush car wash systems.

Color: Orange

Scent: Mild

Foaming Ability: Very High

Features

Highly concentrated

High viscosity

Good lubricity

High detergency

= **Benefits**

= Low cost per car

= Long lasting

= Reduces cloth friction and foam squeaking

= Keeps cloth and lines clean

Applications / Dilution Ratios

| <u>Application</u> | <u>Dilution</u> | <u>Ounces</u> |
|---------------------------|------------------------|----------------------|
| Central Soaper System | 1:350 | ¼ to ½ |
| Foam Generator | 1:300 | ½ to 1 |

Guidelines for Application

Clean tank, lines, nozzles, etc. of previous product for best results. More air to the foamers provides fluffier foam; less air provides wetter foam.

Water Quality: Soft water will provide best results, but **SuperSlick®** works very well in hard water too!

Solution Temperatures: Most systems will generally apply the product with cold water, but better cleaning will be achieved with warm or hot water.

PRODUCT:

SuperSlick®

Stock # 1806

Special Instructions

Through a Dema Valve injector it may insert a push-in tip before the Dema to restrict flow to achieve the proper dilution.

We **do not** recommend using this product in conjunction with **UltraClear™** or **Advantage®** in reclaim systems. The reclaim abilities of these products will be negated.

This formula performs better in hard water than many competitive products.

Alternative Products

Note: SuperSlick® is the only product formulated specifically for the foam-type cloth systems. Other conventional body shampoos are listed below.

Foam-It™ Body Shampoo is a standard body shampoo that works well in most conventional cloth and brush systems.

AquaFoam® is a standard body shampoo that is designed for use in hard water applications.

Low pH Sensation® is a high quality foaming detergent that will neutralize alkalinity from any presoak application and help produce a drier car.

UltraClear™ was formulated for friction systems with reclaim systems. It does not foam as much, but will keep cloth and brushes cleaner while settling particles from reclaim systems.

| Titration Chart For SuperSlick® This chart uses "Anionic Titrant" Sample size = 1 tube | Dilution | Drops |
|---|-----------------|--------------|
| | Titrant #1 | |
| | 1:150 | 17 |
| | 1:200 | 14 |
| | 1:250 | 11 |
| | 1:300 | 10 |
| | 1:350 | 9 |
| | 1:400 | 8 |
| | Titrant #2 | |
| | 1:500 | 18 |
| | 1:600 | 15 |
| | 1:700 | 13 |
